

Mobius Flower Necklace

Materials:

18g 6mm ID jump rings* (11)
1 Neck Cord

Recommended Tools:

2 Chain Nose Chainmaille Pliers

*Jump rings are AWG wire and Inner Diameter measurements

Step 1

To make the mobius flower, take an 18g 6mm jump ring and close it, taking the time to get the join as seamless as possible.

Step 2

Take another 6mm jump ring and connect to the closed jump ring from Step 1. Lay the second jump ring on top of the first jump ring.

Step 3

Take another 6mm jump ring and connect it through the middle of the other 2 jump rings. Overlap the jump rings and lay them together so they form a circle.

Step 4

Continue this process 7 more times, each time adding a jump ring through the middle of the jump rings and laying them back in a circle. The mobius will have 10 jump rings in it at the end of this Step.

Step 5

Add one more jump ring onto the mobius to serve as a bail.

Step 6

Thread a piece of Satin Cord, Neck Cord, or Chain through the "bail" to finish the necklace.

**The Mobius can be made with any size jump rings and can be a fun addition to any style of jewelry.*
